

OBEX®
ENTRY SYSTEMS

The OBEX® brand of products offers highly effective, comprehensive modular entry solutions designed as a three zone barrier system to prevent dirt and moisture from entering the building.

Available in coordinated colors and patterns, OBEX® entry products are engineered to increase the functionality of a building's entrance without forsaking elements of design or aesthetic. Simple and easy to work with, OBEX® offers entry systems that can be recessed or surface-mounted as well as exterior and interior applications.

OBEX® Zone Entry System

ZONE 1

OUTDOORS: The area just before the building access—ideal for placing a product with scraping action to remove grit and heavy dirt particles such as sand and snow.

Milliken Product Solutions: Prior™ and Tergo

ZONE 2

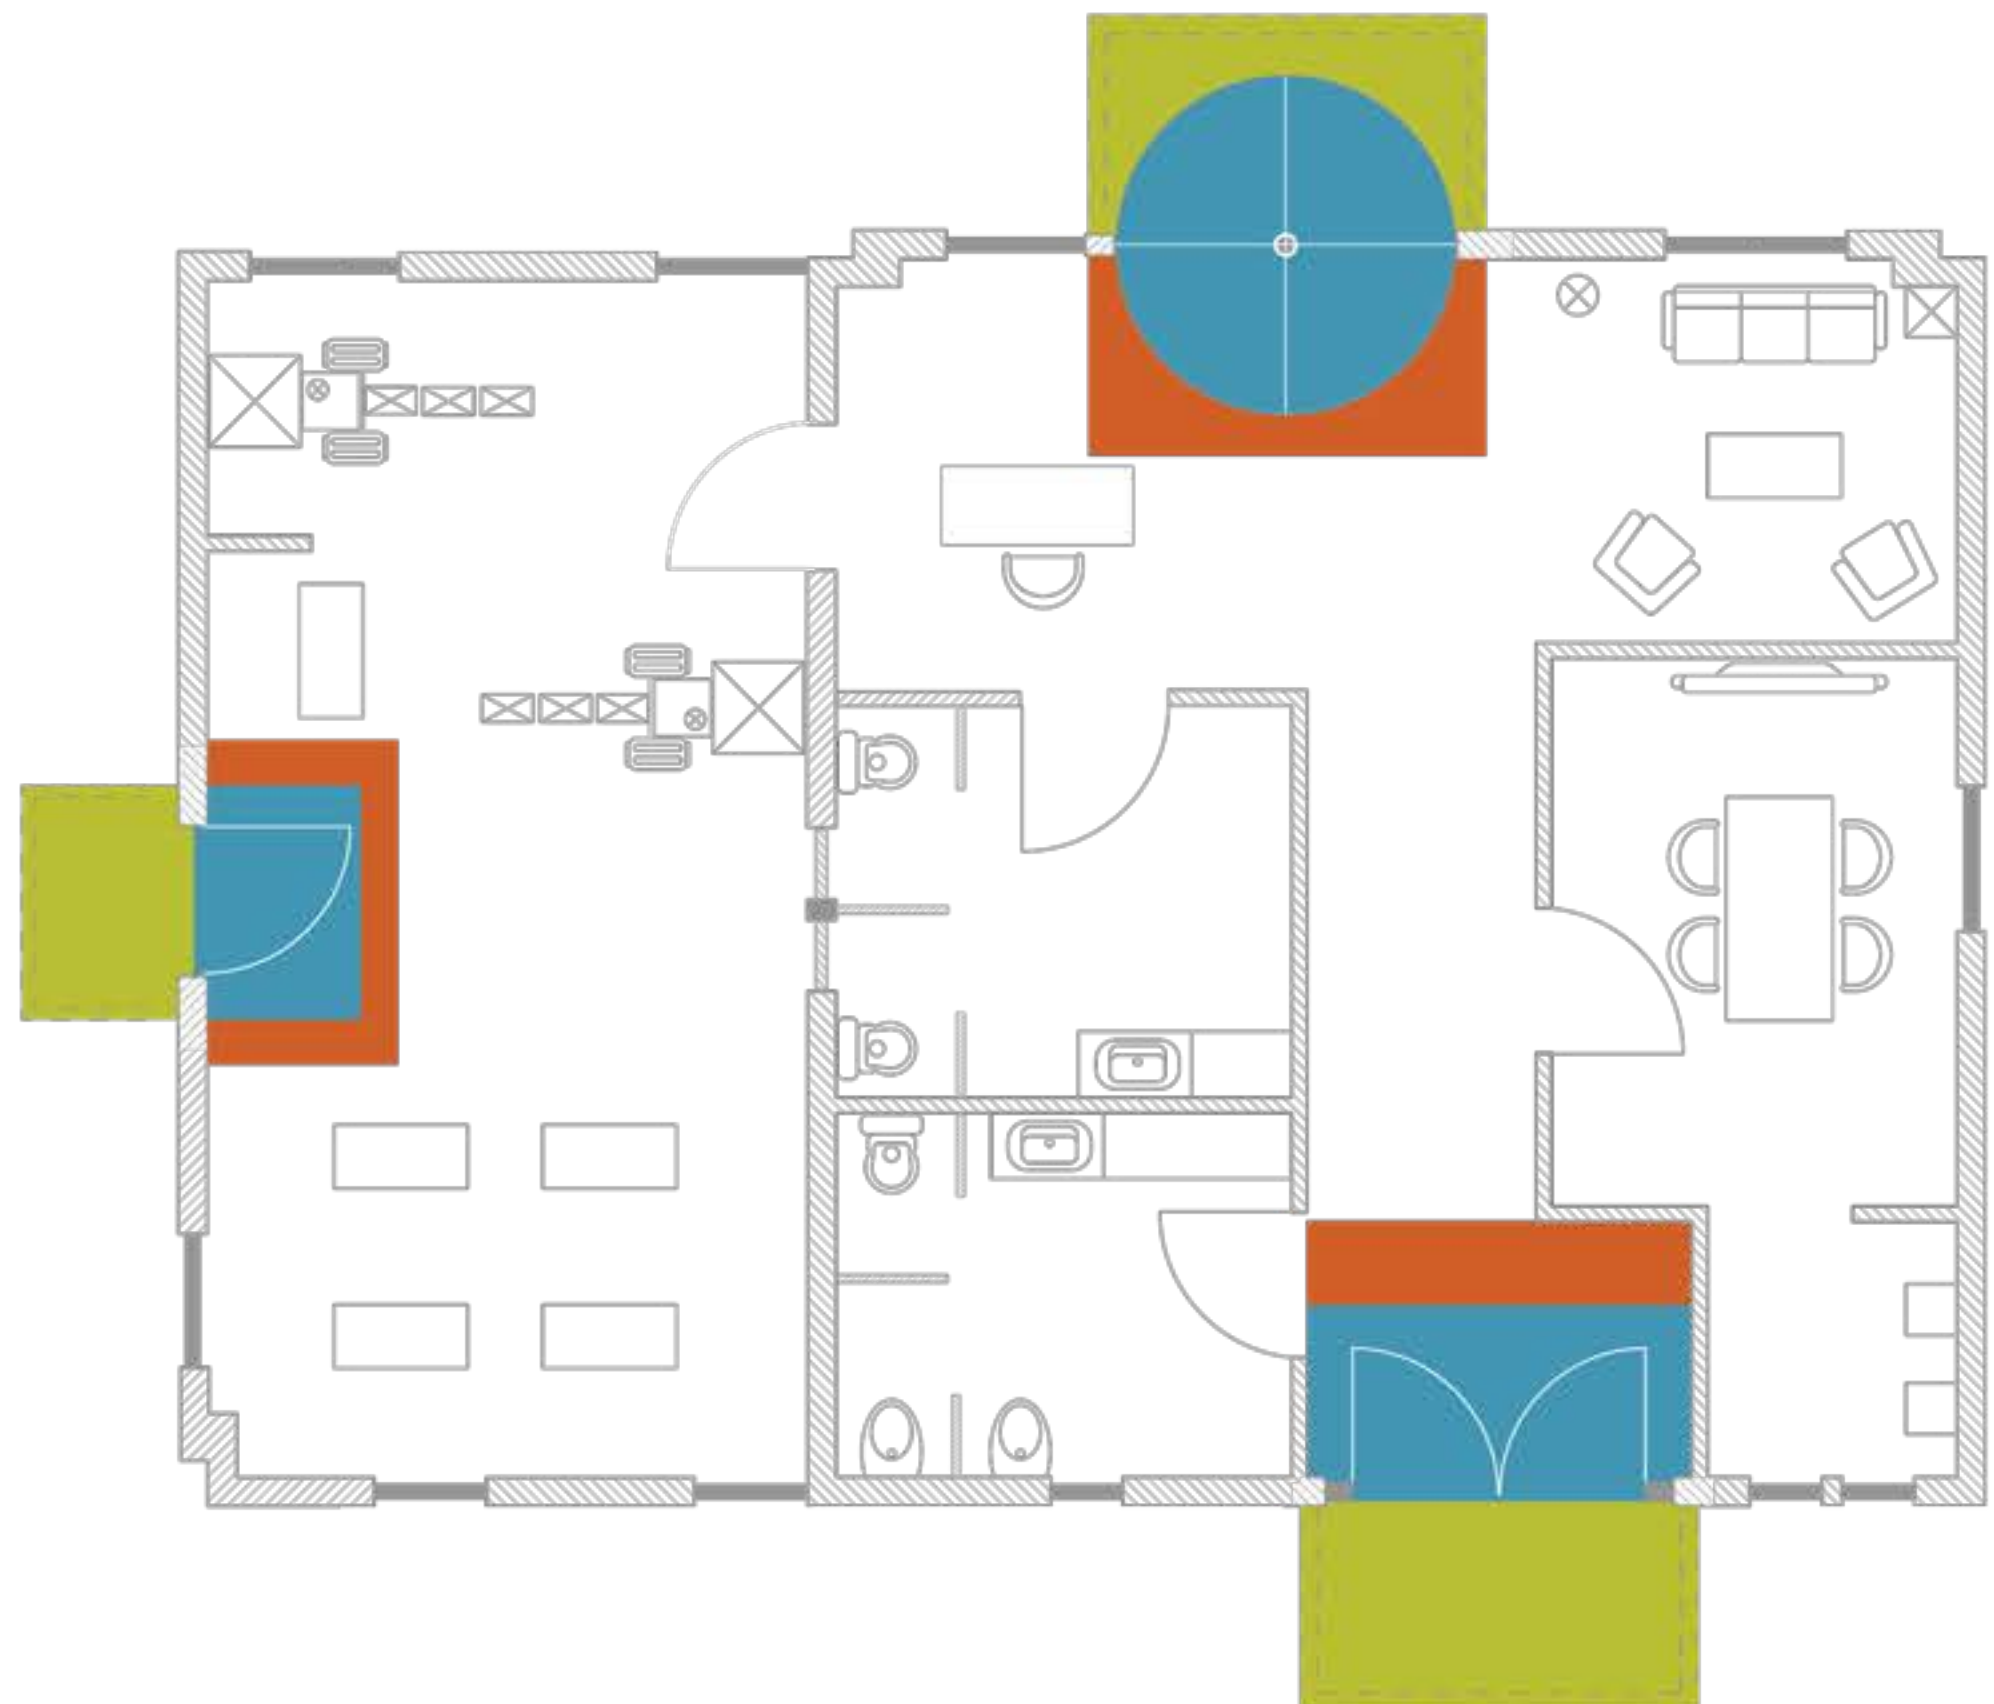

INDOORS: The primary area just inside the building where a product with dual action—scraping and absorbing—should be installed to defend against dirt and moisture. This area often features a recessed matwell.

Milliken Product Solutions: Tergo, Forma™, and Quadrus Brush

ZONE 3

INDOORS: Secondary area inside the building after Zone 2. A textile product for moisture absorption is the preferred choice. Also applicable to circulation areas other than entrances.

Milliken Product Solutions: Quadrus and Quadrus Brush

Arx

Prior™

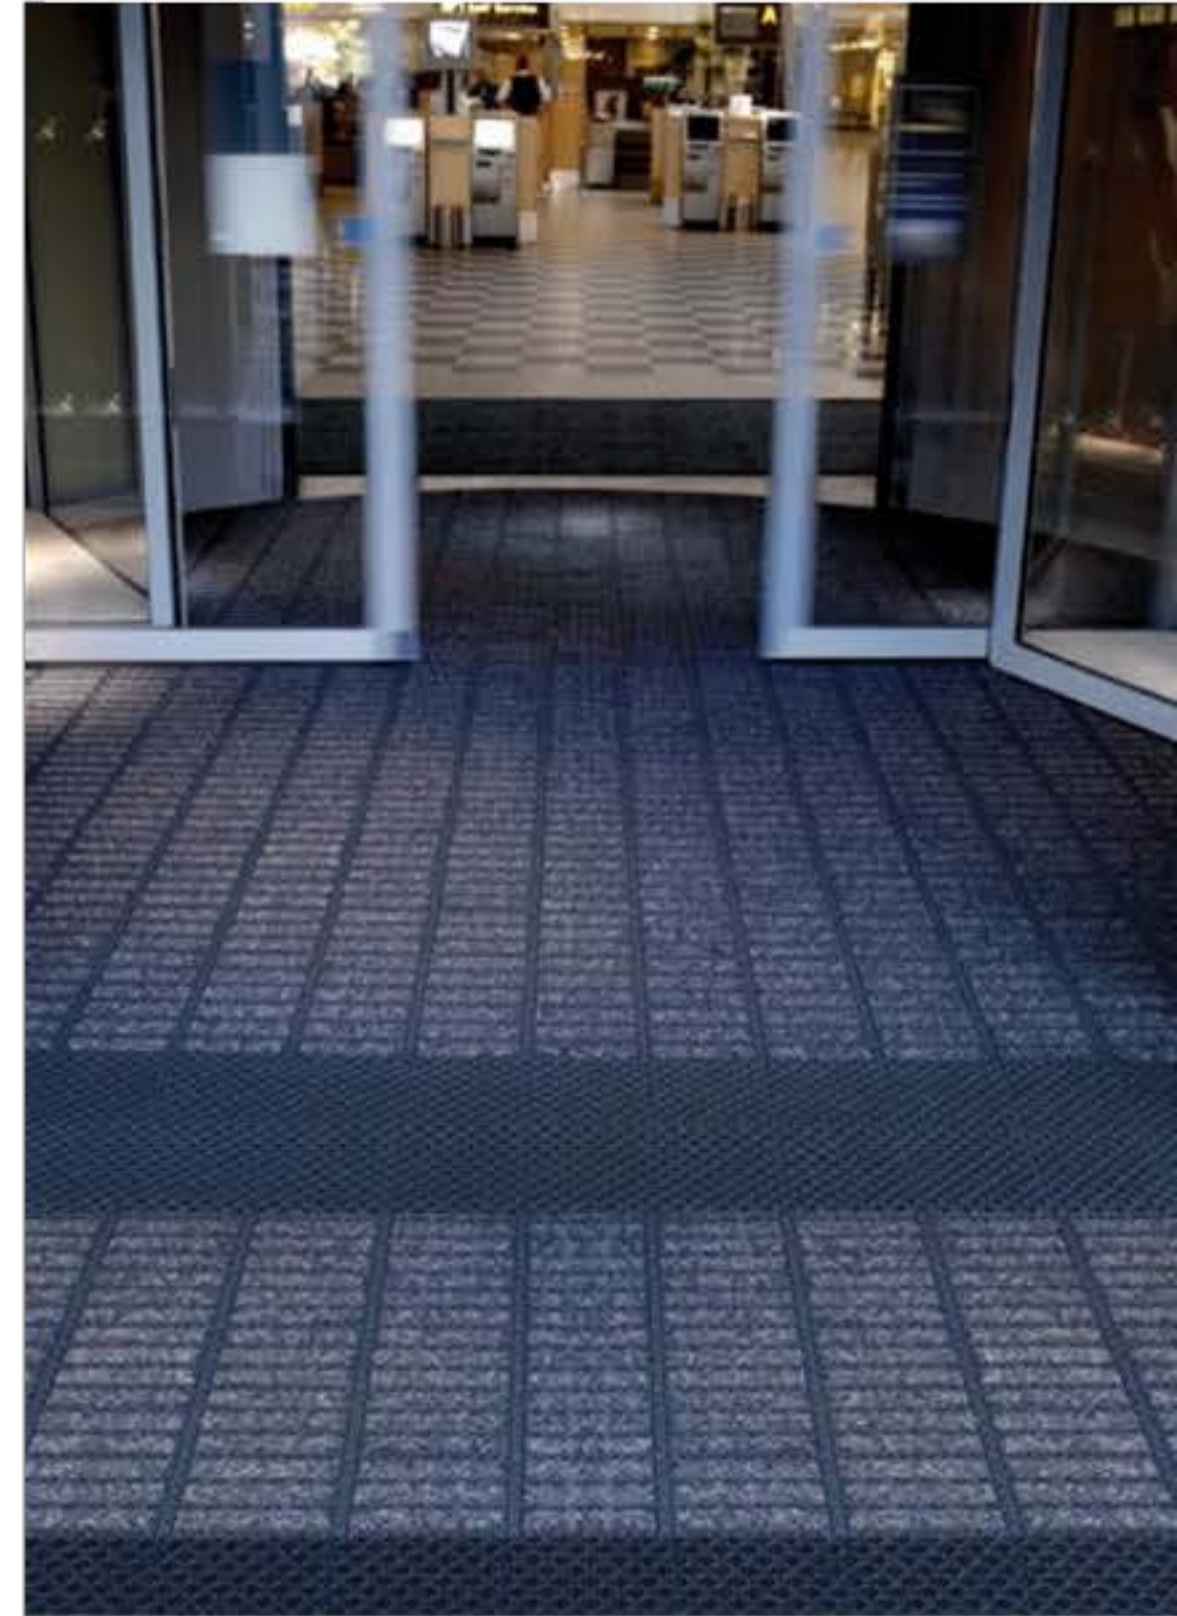

Tergo

Forma™

Arx is our ultra-durable interlocking tile system designed especially for high-traffic areas. Featuring Prior™, Tergo, and Forma™, Arx stops up to 80% of dust, dirt and moisture brought into a building with the first 10 to 30 feet. Prior™ & Tergo offer tough Zone 1 protection and are available in one color, while Forma™ offers Zone 2 protection and 8 fully coordinated contemporary colors.

Prior™ & Tergo

Quadrus

Gravity

Liftoff

Altitude Brush

Orbit Brush

Quadrus is a modular entry tile system that creates a stunning first impression in a space that must also deal with an active world and create a barrier against the elements. Designed to provide a superior combination of performance and aesthetics, the dual-fiber WearOn® nylon yarn and open textile construction will stop dirt and moisture at the door, while allowing easy removal during maintenance.

Quadrus offers two popular designs, Liftoff and Gravity, available in eight colorations to create the perfect balance of design and function.

Quadrus Brush is a more aggressive textile engineered to enhance dirt trapping in facilities without recesses for grid systems. Offered in two attractive designs, Altitude and Orbit, and available in eight colorations, Quadrus Brush strikes a balance of function and design.

Quadrus and Quadrus Brush patterns and colors can be customized, and standard colors coordinate with Prior™ and Forma™ grids.
